

Crestron makes life greener™

Intelligent efficiency

Crestron delivers complete building management for maximum energy and operational efficiency. Only Crestron can monitor, manage and control all the technology throughout the entire facility both centrally and globally.

Crestron Green Light™ technology provides total environmental control to conserve energy and lower costs by combining automated dimming and daylight harvesting with power switching and load shedding.

The only complete, fully integrated control solution

- Total, seamless integration with Crestron lighting, thermostats, shade control, audio/video distribution, amplifiers, digital video and surround sound processors
- Enhanced user experience and control
- Ethernet communications for web-based control and management
- Advanced features such as room scheduling, room combining, load shedding, daylight harvesting and personal workspace control
